

# Green Business Centre

## **Environmental Management System Training (1-2 days)**

### **Overview**

The Environmental Management System Training is for individuals who require a bit more support to help them understand Environmental Management Systems (EMS) and the auditing process.

Our tutors will come to your organisation and discuss how the EMS standard applies specifically to your organisation and in relation to your own EMS. They will explain all the key tasks and documentation required to prepare for your audit.

This session can be delivered to groups of employees or on a one to one basis depending on the needs and requirements.

### **Course content**

- EMS Standard and requirements (ISO 14001, Green Dragon, BS8555 depending on what is used).
- Environmental policy.
- Objectives and Targets.
- Pollution prevention.
- How to complete and implement an internal audit programme (non-conformance, corrective action and follow-up).
- Environmental aspects and impacts (identification of and completion of aspects register).
- Environmental legislation (implementing a Legal Register).
- Monitoring KPIs and carbon calculating.
- Document control.
- Sources of information and further development.

Courses are delivered at your own site at a reduced price. If you prefer to take your training off-site, we can help you arrange a training venue in a suitable location.

### **Who should attend?**

- Those responsible for the development, maintenance and implementation of their organisation's EMS (ISO14001, Green Dragon, BS8555).
- Those responsible carrying out environmental system audits.
- Quality and Health and Safety Auditors who want to improve their professional competence in the area of environmental auditing.
- Environmental professionals that wish to improve their understanding of the EMS auditing process.

### **Outcome and Qualification**

On completion of the course delegates will be will receive a Green Business Centre Certificate.

There is no examination for this course.

**The benefits of bespoke courses include:**

- Flexible, tailored training.
- Content designed to address specific needs against your current management system.
- Scenarios relating to real life experiences of your organisation.
- Training courses at a time & location to suit your business.
- Save on travel and overnight accommodation expenses.
- Training delivery at one inclusive cost.
